CPC-116 Javascript Installation Guide

Technical guide intended to aid in the implementation of the
ClearChoice CPC-116 JavaScript Website Plugin

Document Version:	1.0
Author:	ClearChoice
Publication Date:	March 2020

Introduction

This document is intended for a technical audience and aims to provide assistance when implementing the ClearChoice-116 website plugin on your website. Successful implementation will result in a “Charges” link being displayed on your website (typically in the footer section), which when interacted with will open a page that displays charging information. On initial installation, this charging information will simply inform the user that this content is being worked on, but after its installed, brokers will be given access to tailor this information to their business.

The plugin merely needs to be installed as outlined below. When the user clicks on the relevant “Charges” link, a dialog box will appear that will allow the user to see the charge information for the site.

To install the ClearChoice CPC-116 plugin you will need to enter an API Key Code as a part of the process. You should have received this API Key from your ClearChoice representative. If you have not received this API Key, please contact us on support@clearchoice.ie

Your API Key is associated individually to your website / domain. This key will not work if used on a website / domain other than the one its been configured to work with.

Support

Naturally, every website is unique, and it’s reasonable to think that some people might have questions as they are implementing the steps below. If you do have queries, we would suggest that the quickest way to get an answer is to review the [FAQ section](#) below.

If you cannot find the answer to your question here, please send an email to support@clearchoice.ie Our dedicated support team is standing by to work with you to resolve any issues that you may be experiencing.

Where possible, please avoid sending support requests directly to individual ClearChoice staff members as our experience has shown that doing so can often result in a slower response time

Javascript API – Step by Step Guide

Step No.	Description
1	<p>Place the following code snippet within the <HEAD> of every page on your website:</p> <pre data-bbox="339 495 1382 667"><script id="cc-cpc16-loader" src="https://cpc16api.clearchoice.ie/asset/js/ec1d30b8f67b2fd72dfdf084b3e cf736_JSP" apiKey="1111-2222-3333-4444-7777"> </script></pre> <p> Note 1: Please ensure that you enter the values provided by your ClearChoice representative exactly in the parameters above. In particular, please ensure that you preserve the “_JSP” at the end of the first parameter shown above.</p> <p> Note 2: The exact values (highlighted in yellow above) will be different for each website. Please use the values that have been supplied to you by your ClearChoice representative.</p> <p> Note 3: Ensure that this script block appears on every page of your website. Typically, modern websites will use a templating mechanism whereby this script block can be added to a single header file component.</p>
2	<p>Once the script block has been added to the header, choose the location of the “Charges” link by placing a HTML DIV container (as outlined below) on each page of the website.</p> <pre data-bbox="339 1469 751 1498"><div class="cc-cpc16-link"></div></pre> <p>Typically, this container should be placed in a common location that is shared by each page on your website. Typical locations include within the top-menu on your website and/or within your websites footer.</p> <p> Note 1: Ensure that this container block appears on every page of your website. Typically, modern websites will use a templating mechanism whereby this script block can be added to a single footer file or navigation file component.</p>

3	<p>When you preview your website, you should notice the “Charges” link where you placed it. Clicking on the “Charges” hyperlink should bring you to a page that initially displays a message indicating:</p> <p>“We are currently working to update this information on our website. Please check back soon.”</p>
4	<p>Let us know that you have successfully implemented the plugin and can see the message above by sending an email to support@clearchoice.ie stating</p> <p>“Website plugin installed on: www.yourwebsitename.ie”</p>

Frequently Asked Questions
